THRU : Chief, Industrial Division, OHR
Chief, Manufacturing Sectors Branch, D/I

18 August 1958

Requirements for [REDACTED] 25X1C5b

REFERENCE: Teletype message to CC/C, 14 August 1958.

1. Are the statistics on production of metal products published in the 1955, 56, and 57 Polish Statistical Yearbooks accurate?
2. Are there any statistical data published by the Polish government which are not accurate? If so, what is the reason (inaccurate reports from individual enterprises, poor reporting system from the enterprise to the Central Statistical Office, incomplete coverage of commodity reported with key items left out, etc.)?
3. Are corrections in data reported by individual enterprises to the Central Statistical Office subsequently made in the officially published figures?
4. What kind of controls and inspections are made by the Central Statistical Office or other government offices to ensure that individual enterprises report correct output and other data?
5. What steps are being taken to eliminate surplus workers in metal products plants?
6. What are the chief reasons for the fact that numerous metal working factories are working at very much less than capacity (lack of orders, scarcity of materials or skilled or technical workers, etc.)?
7. To what extent has capacity previously devoted to the manufacture of military products been converted to non-military (especially consumer) goods since early 1957? Has this reduced military production capacity? Give as much detail as possible.
8. Describe any increased authority or responsibilities delegated to the plant director in the past two years in as much detail as possible.

SUBJECT: Requirements for

25X1C5b000AnTextV

9. Find out in what areas the source is especially knowledgeable and report this back to ORR so that additional requirements can be presented. Can he, for example, give a breakdown of the labor force employed in machine building industries by branch of industry (tractors, railroad equipment, bearings, etc.)?
